NORTHERN IRELAND GP FEDERATIONS

GP Federations were established in Northern Ireland with two main aims:

- To support and protect GP Practices
- To help deliver the transformation agenda in Health and Social Care

GP Federations aim to provide better care, delivered in a more responsive way and closer to home, for patients registered on the lists of practices within the Federation. The focus is on working across the local health and social care community, in collaboration with a wide number of agencies, to design and implement innovative healthcare strategies and ways of delivering high quality care.

Across Northern Ireland, there are 17 GP Federations which have been established by GPs to support General Practice and facilitate the transformation of health and social care in a Primary Care setting. Each Federation has been established as a Not-For-Profit Community Interest Company and any financial surplus generated through efficiency is re-invested in front-line services.

Each Federation covers a patient population of approximately 100,000 patients and, because of scale, provides services which would not otherwise be delivered at individual Practice level.

The Federations

The Federations exist in the following locations:

- **NORTHERN Area (4):**
Causeway / Antrim Ballymena / East Antrim / Mid Ulster
- **EASTERN Area (8):**
North Belfast / South Belfast / East Belfast / West Belfast / Ards / North Down / Down / Lisburn
- **SOUTHERN Area (3):**
Newry & District / Craigavon / Armagh & Dungannon
- **WESTERN Area (2):**
Derry / South West

The Federation Support Unit (FSU)

Each area has established and incorporated an FSU. All 17 Federations are supported by 1 of 4 FSUs. Each FSU has been designed to provide Federation members with support, advice and expertise in the design and delivery of service provision. FSU functions include central management expertise, planning, accounting, communication, corporate governance and human resources. In some instances, these services will be outsourced.

The core purpose of the FSU is to ensure that clinicians are free to focus on ensuring they provide the best clinical outcomes for their patients while improving the quality-of-care patients receive.

Direct Service Provision

As Federations grow, develop and mature, they are increasingly recognised as an efficient and effective model for staff employment and service provision as part of the transformation of services in primary care and the community. A range of exciting services have already been introduced for example, General Practice Pharmacy, Advanced Nurse Practitioners, GP locum pool, Social Prescribing, Practice Based Learning (PBL) events and the shared management of a new and enhanced multi-disciplinary team (MDT) in Primary Care. MDTs include practice-based staff, district nurses, health visitors, social workers, physiotherapists and senior mental health practitioner.
